

AP PSYCHOLOGY EXAM REVIEW SHEET

"Confusing Pairs"

Independent Variable (What is tested) vs. Dependent Variable (What is measured)
(Ex: Recess to test attention span; recess is independent, attention span is dependent)

Experimental Group (Group that is tested) vs. Control Group (Compared to the experimental, receives the placebo in a drug experiment.)

Left Brain (Language and Logic) vs. Right Brain (Creative and Spatial)

Corpus Callosum (divides the brain) vs. Cerebral Cortex (covers the brain)

Sympathetic Nervous System ("flight-or-flight") vs. Parasympathetic (calming)

Neurotransmitters (in the nervous system) vs. Hormones (in the endocrine system)

Lateral Hypothalamus (stimulates hunger) vs. Ventromedial Hypothalamus (suppresses hunger)

Broca's Area (makes words) vs. Wernicke's Area (comprehends words)

Identical Twins (Same fertilized egg) vs. Fraternal Twins (Two separate eggs)

Afferent Neurons (Sensory, body to the brain) vs. Efferent Neurons (Motor, brain to the body)

Assimilation (All four-legged animals are "doggies") vs. Accommodation ("Doggies are different than "Kitties")

Concrete Operations (logical thinking) vs. Formal Operations (philosophical thinking)

Sensation (Bottom-up Processing) vs. Perception (Top-Down Processing)

Rods (Night vision) vs. Cones (Color vision)

Classical Conditioning (Involuntary) vs. Operant Conditioning (Voluntary)

Primacy Effect (first items remembered) vs. Recency Effect (last items remembered)

Proactive Interference (loss of the new info) vs. Retroactive Interference (loss of the old info)

Implicit memory (nondeclarative; skills) vs. Explicit Memory (declarative, facts)

Recall Memory (No cues) vs. Recognition Memory (Some hints)

Algorithms (step-by-step) vs. Heuristics (Rule-of-thumb)

Representative Heuristics (Stereotypes) vs. Availability Heuristics (Based on available info, planes safer than cars)

Phonemes (Basic sound units) vs. Morphemes (Basic units of meaning)

Fluid Intelligence ("Brain power") vs. Crystallized Intelligence (Acquired knowledge)

Validity (test measure what it should) vs. Reliability (Same scores on a retest)

Achievement test (What you've learned) vs. Aptitude test (what you can do)

Intrinsic Motivation (For personal satisfaction) vs. Extrinsic Motivation (for rewards or to avoid punishment)

Theory Y (democratic) vs. Theory X (rewards or punishment)

Internal Locus (Controlling the environment) vs. External Locus (the environment controls you.)

Lithium (treats bi-polar) vs. Librium (treats anxiety)

Type A (high stress) vs. Type B (low stress)
